RESEARCH GROUP IN AUTOMATION AND COMPUTERS

GENERAL PRESENTATION

The main aim of the group is to develop high-level research in the fields of automatic control, computer and software engineering and information technology. It offers the research results in these fields to interested companies and organizations all over the world.

Head of the Research Group: **Prof. dr. eng. Stefan PREITL**, recipient of the *Grigore Moisil* Prize of the Romanian Academy for his contribution on fuzzy control.

Tel: +40-256 403224, +40-256403229
 Fax: +40-256 403214 (at the Dean's office)
 E-mail: stefan.preitl@aut.upt.ro
 Web: <http://www.aut.upt.ro/~spreitl/>

The group is organized in two research divisions:

- *Research Division in Automation and Applied Informatics*

Head of division: Prof. dr. eng Radu-Emil Precup

- *Research Division in Computer Science and Engineering*

Head of division: Prof. dr. eng. Marius Crișan

RESEARCH DIVISION IN AUTOMATION AND APPLIED INFORMATICS

CONTACT

Prof. dr. eng. Radu-Emil PRECUP, recipient of the *Grigore Moisil* Prize of the Romanian Academy for his contribution on fuzzy control.

Research in *PROCESS CONTROL*

RESEARCH TEAM

- Prof. dr. eng. Stefan Preitl, head of the team
- Prof. dr. eng. Radu-Emil Precup
- Dipl. eng. Claudia-Adina Dragoș, PhD student
- Dipl. eng. Mircea-Bogdan Rădac, PhD student
- Dipl. eng. Daniela Bărbulescu, PhD student.

RESEARCH FIELDS

- Conventional control system structures
- Advanced control systems.

KEYWORDS

Fuzzy logic control; iterative methods; sliding mode control; intelligent systems; optimization; 2-DOF control; stability analysis; sensitivity analysis; robustness; convergence; mobile robots; servo systems; embedded systems; signal processing.

MAIN ACTIVITIES

- Development of conventional and advanced control systems
- Signal processing in control systems
- Soft computing in industrial applications
- Development of control systems for servo systems
- Development of control systems for mechatronics and mobile robots.

RESULTS

RESEARCH GRANTS AND PROJECTS

National grants and projects

1. Research Grant of the National Centre for Programme Management (CNMP), Type PN2 Partnerships in Priority R&T Domains Programme (2008-2011), no. 12100/01.10.2008. Title: *Real-Time Informatics Technologies for Embedded-System-Control of Power-Train in Automotive Design and Applications (SICONA)*,

Partners: "Politehnica" University of Timisoara (PUT) – P2, "Gh. Asachi" Technical University of Iasi – coordinator, Politehnica University of Bucharest – P1, SC Siemens VDO Automotive – P3. Director: Prof. dr. eng. Corneliu Lazăr (TUI), director of PUT partner (P2): Prof. dr. eng. Radu-Emil Precup (granted value for 2008: 44.499 LEI)

Research team: Prof. Radu-Emil Precup – director of PUT partner (P2), Prof. Stefan Preitl, Assoc. Prof. Florin Drăgan, Lect. Dan Ungureanu-Anghel, Assist. Prof. Daniel Iercan, Assist. Prof. Emil Voîsan, PhD student Mircea-Bogdan Radac, PhD student Claudia-Adina Dragoș, Teaching Assist. Lucian-Ovidiu Fedorovici.

The main objective of the project consists in developing new informatics technologies for improving the performances of the embedded systems controlling the power-train of cars equipped with automated gearboxes. The project applies modern modeling and control strategies to the power-train and its subsystems. On these bases, real-time software modules are developed for the embedded systems, yielding much better operation performances than ensured by the currently used solutions (meaning PID regulation).

Several nonlinear and linearized models and low-cost control solutions have been proposed and tested in 2009 by the research team at the P2 partner. They include Tensor Product-based models, S functions and original design methods dedicated to fuzzy control systems. The digital simulation results show the control system performance enhancement. 4 papers were presented and/or published in journals and conference proceedings.

International grants and projects

1. Bilateral research contract, 2008-2009, partners: "Politehnica" University of Timisoara (PUT), Romania, and Budapest Tech Polytechnical Institution (BMF), Hungary, Type PN2 Capacities Module III Programme (2008-2009), Protocol of the 4th Meeting of the Romanian - Hungarian Intergovernmental Committee on Cooperation in Science and Technology / 18.02.2008; RO ID 39 in Annex, Title: *Integration of Iterative Learning Control (ILC) and Fuzzy Methods in Intelligent Control Systems*. Directors: Prof. dr. eng. Stefan Preitl (PUT, Romanian partner) and Prof. dr. Janos Fodor (BMF, Hungarian partner), (granted value for 2009: 13.157 LEI and 8.000 EUR)

Research team: Prof. Stefan Preitl – director of Romanian partner, Prof. Radu-Emil Precup – associate director of Romanian partner, Assoc. Prof. Florin Drăgan, Assist. Prof. Emil Voîsan,

Assist Prof. Daniel Iercan, PhD student Claudia-Adina Dragoș.

The grant concerns the analysis, development and implementation of new intelligent fuzzy control structures, design techniques and applications on iterative feedback control. The mathematical support is very complex, and the approach needs a strong cooperation between specialist in mathematic/informatics and control engineers. Consequently, ILC techniques treated by the Romanian partner are completed by fuzzy logic techniques, which are one of the main research areas at the Hungarian partner.

Fuzzy controllers are developed usually in heuristic manner, and the obvious necessity for systematic development methods dedicated to these controllers has not been covered yet. Besides the sensitivity and stability analysis of fuzzy systems is in permanent actuality.

The two research teams co-organize biannually the International Symposiums on Applied Computational Intelligence and Informatics (SACI), in Timisoara, dedicated to the exchange of research results in the field. 6 joint papers were presented and/or published in journals and conference proceedings.

2. Bilateral research contract, 2008-2009, partners: "Politehnica" University of Timisoara (PUT), Romania, and University of Ljubljana (UL), Slovenia, Type PN2 Capacities Module III Programme (2008-2009), Protocol of the Third Meeting of the Joint Committee for Scientific and Technological Co-operation between Romania and the Republic of Slovenia/ 11.12.2007-24.12.2007; ID no 3 in Annex 1. Title: *New Results in Development and Applications of Fuzzy Control Systems*. Directors: Prof. dr. eng. Radu-Emil Precup (PUT, Romanian partner) and Assoc. Prof. dr. Škrjanc (UL, Slovenian partner), (granted value for 2009: 13.557 LEI and 8.000 EUR)

Research team: Radu-Emil Precup – director of Romanian partner, Prof. Prof. Stefan Preitl – associate director of Romanian partner, Assoc. Prof. Florin Drăgan, Lect. Dan Ungureanu-Anghel, Assist. Prof. Emil Voîsan, Assist Prof. Daniel Iercan, PhD student Claudia-Adina Dragoș, PhD student Mircea-Bogdan Rădac.

The grant deals with the development and implementation of new fuzzy control structures and design techniques that employ the stability analysis, the sensitivity analysis with respect to parametric variations of the controlled plants, the predictive control techniques and the fuzzy modeling. Several classes of fuzzy control systems are investigated. It is justified to unify and complement the efforts of the two research

teams to contribute to better systematic application-oriented approaches resulting in low-cost fuzzy control systems.

The control solutions created by the two research teams are supported by their previous experience. The results are tested in several industrial and non-industrial applications. The laboratory equipment at both partners allows the implementation of fuzzy controllers aiming the illustration of the performance improvements. 1 joint ISI journal paper has been accepted for publication.

PERSPECTIVE DOMAINS

- Methods for the algorithmic design of conventional and intelligent controllers (fuzzy, neural, genetic, sliding mode)
- Methods for signal processing and computer-aided design of control systems
- Analysis and development of intelligent systems
- Solutions for the automatic design of model-free control structures
- Control solutions for mechatronics, power systems, electrical drives, general industrial automation, mobile robots.

STRATEGIC PRIORITIES

- Control systems with imposed sensitivity
- Tools for computer-aided design of 2-DOF controllers
- Computer-aided techniques in Iterative Feedback Tuning and Iterative Learning Control
- Low cost solutions for control problems dedicated to mechatronics and mobile robots
- Derivative-free optimization in modeling and control design
- Methods and tools to enable the systematic development of fuzzy control systems.

Researches in RENEWABLE ENERGY, SENSOR NETWORKS, SYSTEM IDENTIFICATION, ADAPTIVE SYSTEMS

RESEARCH TEAM

- Prof. dr. eng. Octavian Proștean, head of team
- Prof. dr. eng. Nicolae Budăian
- Prof. dr. eng. Ioan Filip
- Assist. eng. Iosif Széidert
- Assist. eng. Cristian Vașar
- Assist. eng. Andreea Robu, PhD student
- Assist. eng. Raul Robu, PhD student

RESEARCH FIELDS

- Unconventional energetic
- Wireless sensor networks
- System modeling, identification and simulation
- Neural networks and fuzzy systems
- Adaptive control systems
- Distributed databases

KEYWORDS

Renewable energy, wireless sensor networks, modeling; identification and simulation of systems; neural networks and fuzzy systems; wind energy conversion systems; unconventional energetic; adaptive control; self-tuning, databases.

MAIN ACTIVITIES

- Modeling, simulation and development of wind energy conversion systems (WECS)
- Identification and parameter estimation of electrical machines (asynchronous and synchronous)
- Development of new enhanced electrical machines types
- Development of control systems for WECS
- Control software development in industrial applications
- Modeling and simulation of systems with neural networks
- Development of WECS software
- Development of adaptive control structures
- Applications based on wireless sensor networks.

- Development of applications based on distributed databases.

RESEARCH GRANTS AND PROJECTS

National grants and projects

1. EEA research grant "*Improvement of the Structures and Efficiency of Small Horizontal Axis Wind Generators with Non-Regulated Blades*", Grant Type EEA, Contract no. RO0018, Director: Prof. Octavian Prostean, PhD, Financial value: 1.200.000 EUR

The proposed project has the research theme, goal and objectives associated to the priority research domains at international level, regarding new small wind generators structures. Thus, the presented project is under the following priority sector: "Protection of the environment, including the human environment, through, inter alia, the reduction of pollution and the promotion of renewable energy", having the focus area on "Developing renewable energy sources, including geothermal energy and hydropower".

Recent documents issued by national and international organizations promote the usage of renewable energy resources Directives of the European Parliament of the Council of the Promotion of Electricity from Renewable Energy Sources in the Internal Electricity Market, Romanian Government Decisions regarding the approval of the renewable energy resources strategies, et. al.

The project has the focus area of developing renewable energy sources, which promote the protection of the environment, by reducing of pollution.

The overall objectives concern the increase of the usage degree of wind energy conversion systems as a non-pollutant energy source, conducting to the reducing of carbon and pollution, in concordance to the global trend of ecologic energy production.

The project aims the realization of new/improved small wind generators having presently, high cost price of produced energy in comparison with medium and high power aggregates. This is the reason why USA elaborated (by American Wind Energy Association) the "ROADMAP 20-year

industry plan for small wind turbine technology" that aims the drastically reduction of the present energy cost. The project has in view all elements of small wind generators. The project's beneficiary is able to organize the research and implementation of the project that will certainly lead to the efficientization and to the reducing of the cost of such types of wind generators. The beneficiary has relevant experience in the field, and the human resources are specialized in all required domains: wind turbines, mechanical systems, electrical generators, power electronic converters, control systems, project management.

"Politehnica" University of Timisoara, has a long term experience inclusively in the domain of small power wind generators: for a Canadian corporation (vertical axis wind turbine) and for Romanian users (horizontal axis wind turbines). In Timisoara there are factory equipped with necessary technologies for such aggregates.

PERSPECTIVE DOMAINS

- Real time control of induction and synchronous machines using LabView (LabWindowsCVI) using the National Instruments Data Acquisition Systems and by using DSpace hardware
- Advanced control of wind aggregates
- Neural network control systems

STRATEGIC PRIORITIES

- Study of innovative control systems for wind aggregates: MPPT methods, genetic algorithms
- Tools for statistical wind measurement related data, for short-term forecasting used in wind speed prediction based windmill control systems and for simulation of autonomous wind farms aggregates

RESEARCH GRANTS AND PROJECTS

1. *TELEASIS – NGN support-based, Complex System for home tele-attendance of elderly people*. 2nd Romanian National Research Program PN2

Participants: academic, research and medical organizations and SME's from Bucureşti, Timişoara, Iaşi, Piteşti. Local staff: Lăcrămioara Stoicu-Tivadar, Vasile Stoicu-Tivadar, Dorin Berian, Romina Pintea, Raul Robu, Andreea Robu,

Vasile Topac, ("Politehnica" University of Timișoara).

The main objective of the project is the development of a tele-support system for elderly people, from medical and social perspective, as well. This system has as a goal the implementation and development of the social and medical support services of elderly people, at their homes, in accordance with the fulfillment of the requirement of this category, to live in their own homes not in asylum. In this way, the project contributes to increase the active live duration of the people, and to optimize the customized management of the way of life of the assisted person.

The planned R&D activities will develop:

- an experimental model for a specific local intelligent unit for the homes of the elderly people
- an experimental model for the Teleassistace Centre
- the telecare network
- the specific database and the required software solutions
- a model of tele-attendance services
- a complete guide of the developed know-how and technology.

The project will contribute to the development of knowledge related to NGN networks, and middleware technologies, to the development of the complex tele-attendance software systems.

2. SIMIMED - Integrated medical information management system based on HL7 Standard.
2nd Romanian National Research Program PN2

Participants: academic and medical organizations and SME's from Cluj, Timișoara, and Brașov. Local staff: Lăcrămioara Stoicu-Tivadar, Vasile Stoicu-Tivadar, Dorin Berian, Romina Pintea, Raul Robu, Andreea Robu, Vasile Topac ("Politehnica" University of Timișoara).

The main objective of the project is the research, design and implementation of a pilot integrated system development for the management of the patients, human and material resources in a hospital (Hospital Information System – HIS), based on the more advances Standards form the medical informatics domain - HL7, DICOM, EN 13606, adapted to the needs of the Romanian Healthcare system.

The planned R&D activities are:

- The analysis of the actual context and the general design
- The technical specifications definition for the HIS
- The development of the kernel of the HIS, including the compliance with HL7 Standard

- The design and the implementation of the software modules for each medical specialty
- The design and development of HL7-compliant communication interfaces with other Healthcare information systems
- The enlargement of the partnership with other medical organizations in order to implement the results of the project.

In this way, the project will develop a modular and flexible solution that one can adapt to any Healthcare organization, and can integrate with other existing Healthcare Information systems.

PERSPECTIVE DOMAINS

- a. Distributed architectures and appropriate technological solutions
- b. Mobile applications and related technologies
- c. Interoperability standards in distributed medical informatics
- d. Solutions for integrated healthcare networks and interoperability

STRATEGIC PRIORITIES

The group intends to develop strategic researches on the directions specified in the domain by the European Community:

- The Education and Training of high level healthcare managers and policy makers on the strategic role of ICT in Healthcare and change management
- To implement programs on education and training, and other actions to promote awareness and to reduce resistance to change of healthcare professionals
- To set up specific awareness actions addressing sensitive groups, such as: academic circles, high reputation specialists at university hospitals and other local medical opinion leaders, clinical research groups, medicine and nursing students
- To improve mutual learning through information interchange, particularly to avoid cultural mismatches.

Researches in **REAL-TIME CONTROL SYSTEMS**

RESEARCH TEAM

- Prof. dr. eng. Nicolae Robu, head of the team
- Prof. dr. eng. Gheorghe-Daniel Andreescu
- Prof. dr. eng. Toma-Leonida Dragomir
- Prof. dr. eng. Ioan Silea
- Lecturer dr. eng. Sorin Nanu
- Assist. eng. Tiberiu Ionică
- PhD. student eng. Mihai Iacob
- PhD. student eng. Cristian Schlezinger

RESEARCH FIELDS

- Advanced Control of AC drives: Sensorless Control of IPMSM; Fault-tolerant Control
- Automotive Electric Actuation Technologies
- Applications to Electric and Hybrid Vehicles.

KEYWORDS

- Advanced control of electrical drives; Automotive electric actuation; Sensorless control; State and disturbance observers; Variable structure flux-observer with signal injection; Active flux observer; Fault-tolerance; Fuzzy-interpolating implementation Wind energy; Solar energy, Informatics systems, SCADA, Real-time implementations.

MAIN ACTIVITIES

- Control systems in Automotive electric actuation technologies
- Development of Sensorless control system with hybrid observer from zero speed for starter-generator with IPMSM for EHV
- Sensorless control of high-speed SPMSM
- Wind turbine PMSG sensorless control
- Real-time implementation and testing using DSpace for Sensorless control system of AC drives
- Informatics systems
- Solar energy.

RESEARCH GRANTS AND PROJECTS

International grants and projects

1. Research EU Grant within 7th Framework Programme (FP7), Project title: *Energy Efficient Vehicles for Road Transport (EE-VERT)*; Grant no. 218598/ Nov. 2008, period 2009-2011; Director of UPT partner: Prof. Ion Boldea; member Prof. Gheorghe-Daniel Andreescu.
2. Research EU Grant 7th Framework Programme (FP7): Project title: *We steer - Actions to Sustain an Emerged Cluster for Automotive Field Based on the Research in West Region*; Project no. 205887/2007, period: 2008-2010, UPT Partner Subcontract no. 12935/ 21.08.2008; Director of UPT partner: Prof. Ioan Silea; member Prof. Toma Leonida Dragomir, (total financial value for UPT: 28.000 EUR; value for 2009: 4.200 EUR)

National grants and projects

1. Research Grant in 2nd Romanian National Research Program PN2, Section: Partners in Priority Domains; Project title: *Integrated Systems for Real-Time Control of Networked Processes – SICOTIR*; Project no. 15492/14.09.2007, period 2007-2010; Director of UPT partner: Prof. Ioan Silea (total financial value for UPT: 300.000 Lei; value for 2009: 39.000 Lei)
2. Research Grant in 2nd Romanian National Research Program PN2, Section: Ideas Program; Project title: *Research in Design and Implementation of Modern Solutions for Secured Information in Distributed Systems, SCADA, DCS and Remote Control with Applications in Gases Distribution*, Project no. 15492/ 14.09.2007, period 2007-2010; Director: Prof. Ioan Silea (total financial value 254.000 Lei; value for 2009: 28.000 Lei)

PERSPECTIVE DOMAINS

- Automotive control
- Advanced control of electric drives, Robotics
- Real-time control using LabView
- Applications with FPGA using VHDL, Xilinx
- SCADA systems

STRATEGIC PRIORITIES

- Control of EHV and Automotive Electric Actuator Technologies
- DSpace platform, LabView real-time platform
- SCADA systems

Researches in ADVANCED COMPUTING ARCHITECTURES AND SYSTEMS

RESEARCH TEAM

- Prof. dr. eng. Mircea Vladutiu
- Lect. dr. eng. Lucian Prodan
- Lect. dr. eng. Mihai Udrescu-Milosav
- Assist. dr. eng. Alexandru Amaricai-Boncalo
- Assist. dr. eng. Oana Boncalo
- Assist. eng. Versavia Ancusa
- Eng. Răzvan Bogdan
- Eng. Cristian Ruican
- Eng. Flavius Opritoiu (PhD Student)

MAIN ACTIVITIES

- Watchdog processor for reliability increasing of computers
- Self testing development concepts
- Self checking development tools
- Digital system testing based on data compression (transitions counting syndrome, linear feedback shift register)

- Equipment structures with fault tolerant capability (error detecting and correcting codes, triple modular redundancy)
- Bio-Inspired Design of Applications on Reconfigurable Platforms

RESEARCH GRANTS AND PROJECTS

1. *ICT-eMuCo: Embedded Multi-Core Processing for Mobile Communication Systems* director Cretu V.-I., team: Ciocarlie H., Marcu M., Micea M., Tudor D., Jebelean C., Macariu G., Contract No: 216378/1 Feb. 2008; financed by: EU; UPT value 74.300 EUR.
2. *Framework de Executie pentru optimizarea consumului aplicatiilor mobile*, director Marcu M., team: Popa M., Fuicu S., Tudor D., Stratulat B., Stratulat I., Contract No: 680/19.01.2009; financed by: CNCSIS; UPT value 61.758 RON.

3. *MELISSEVS: Dezvoltarea si analiza unui model integrat de reprezentare a sistemelor colaborative robotice si de senzori inteligenți în aplicatii de explorare-supraveghere de mediu* director Micea M.V., team: Cretu V.-I., Chiciudean D., Cioarga R., Stratulat B., Contract No ID_22/2007-2010, Contract No. 58/01.10.2007; financed by: UEFISCSCU, MEdCI; UPT value 100.926 RON.
4. *SICRAMAS: Sistem inteligent de conducere neliniara robust-adaptiva dupa fluxul rotoric a actionarilor cu motoare asincrone* director Micea M.V., team: Cretu V.-I., Stratulat M., Micea C., Miclea F., Cioarga R., Ciubotaru B., Chidiucean D., Stanescu D., Contract No. PDP_2306, Contract nr. 71-065/18.09.2007; financed by: UEFISCSCU, MEdCI; UPT value 30.000 RON
5. *FILOLET Innovative System for Electrical Energy Monitoring Based on Wavelet Transformation for Industrial Consumers*, director Micea M.V., team: Cretu V.-I., Stratulat M., Micea C., Miclea F., Cioarga R., Chidiucean D., Stanescu D., Stratulat B., Stratulat I., Contract No PDP_4339, Contract No. 22-137/01.10.2008; financed by: UEFISCSCU, MEdCI; UPT value 6.500 RON
6. *UNIQUE Integration of Particulate Abatement, Removal of Trace Elements and Tar Reforming in one Biomass Steam Gasification Reactor Yielding High Purity Syngas for Efficient CHP and Power Plants*, director Todinca T., team: Dumitrel A., Holotescu C., Contract No. 211517/2009.
7. *MERLIN: Platforma IT de Modelare, Simulare, Planificare si Optimizare a Productiei Automatizate in Industria Semiconducatorilor*, Cretu V., Micea M.V., Contract No. PDP_1262, Contract No. 198/12.09.2008; financed by: UEFISCSCU, MEdCI; UPT value 23.580 RON

Research in SOFTWARE ENGINEERING

RESEARCH TEAM

- Prof. dr. eng. Ioan Jurca, head of the team
- Assoc. Prof. dr. eng. Marius Minea
- Assoc. Prof. dr. eng. Radu Marinescu

- Assist. dr. eng. Cristina Marinescu
- Assist. eng. Petru Mihancea
- Assist. eng. Dan Cosma
- Assist. eng. Adrian Petru Mierluță
- Assist. eng. Ciprian-Bogdan Chirilă

MAIN ACTIVITIES

- Development of Integrated Evolving Environments for Software System Analysis
- Design of object-oriented software systems
- Engineering of complex software systems
- System modeling, verification and validation

RESULTS

Research in DISTRIBUTED DATA BASES AND ARTIFICIAL INTELLIGENCE

RESEARCH TEAM

- Prof. dr. eng. Ștefan Holban
- Prof. dr. eng. Ionel Jian
- Prof. dr. eng. Marius Crișan
- Assoc. Prof. dr. eng. Dan Pescaru
- Lect. dr. eng. Sorin Babii
- Assist. eng. Cosmin Cernazanu
- Assist. eng. Dan Ciresan

MAIN ACTIVITIES

- Designing and implementing relational databases with complex network structures
- Pattern recognition in medicine and chemistry
- Development of hybrid expert systems for research in medical IT
- Developing complex distributed databases and Internet access to databases in companies, banks and local administration
- Interdisciplinary cooperation for expert and cognitive systems development
- E-Learning Application-Oriented Intelligent Agent with Pedagogic Functions

AUTONOMOUS RESEARCH GROUPS

DEPARTMENT OF AUTOMATION AND APPLIED INFORMATICS

MAIN RESEARCH FIELDS

- System theory applications in fault detection and diagnosis
- System analysis using sensitivities
- Development of control system devices
- Interpolative, fuzzy and neural systems
- Virtual instrumentation in control
- Control of electrical drives
- Time-delay systems
- Biomedical modeling
- Quality Management

Research group in APPLIED SYSTEMS THEORY

RESEARCH TEAM

- Prof. dr. eng. Toma-Leonida Dragomir, head of the team
- Prof. dr. eng. Constantin Voloșencu
- Lecturer dr. eng. Dorina Popescu
- Lecturer dr. eng. Sorin Nanu
- Assist. eng. Ana Maria Dan
- Lecturer dr. eng. Adrian Korodi
- Student Alexandru Codrean
- Student Vlad Ceregan

MAIN RESEARCH FIELDS

- System theory applications in fault detection and diagnosis
- System analysis using sensitivities
- Development of control system devices
- Interpolative, fuzzy and neural systems
- Virtual instrumentation in control
- Control of electrical drives
- Time-delay systems
- Management of the innovation and creativity
- Sensor networks
- System identification

KEYWORDS

Fault detection; identification and diagnosis; modeling; system safety and availability; controller design; process control; interpolating strategies; fuzzy logic; neural networks; control of electrical drives; virtual instruments; sensor networks; system identification, time-delay systems.

 For the field “Management of the Innovation and Creativeness”

Lect. dr. eng. Dorina Popescu
 Tel.: +40-256-40-3231
 E-mail: dorina.popescu@aut.upt.ro

Research group in **PROCESS CONTROL**

RESEARCH TEAM

- Lect. dr. eng. Florin Drăgan
- Assist. dr. eng. Daniel Iercan
- Assist. eng. Onuț Lungu
- Assist. eng. Emil Voișan
- Assist. eng. Lucian Fedorovici

RESEARCH FIELDS

- Chaotic systems
- Programmable Logic Controllers
- Remote control
- Operating Systems
- Real-time Programming

KEYWORDS

Chaotic systems; programmable logic controllers; remote control.

ACTIVITIES

- hard real-time technologies
- robot motion and control
- analysis and synthesis of the electronic converters with chaotic behaviour

STRATEGIC PRIORITIES

- Control of chaotic systems;
- Hard real-time control
- Remote control.

Research group in **CRYPTOLOGY AND INFORMATION SECURITY**

RESEARCH TEAM

- Lecturer dr. eng. Bogdan Groza
- Lecturer dr. eng. Dorina Petrică
- Assist. eng. Lavinia Dragomir
- Assist. eng. Raul Robu
- Assist. eng. Căiman Dadiana
- Eng. Murvay Pal-Ştefan
- Eng. Pop Dragoş-Liviu

RESEARCH FIELDS

- Authentication protocols
- Public-key cryptography
- Provable Security
- Foundations of cryptology
- Number theory
- Applied cryptography

KEYWORDS

Authentication protocols; digital signatures; public-key cryptography; entity authentication; message authentication; cryptography; cryptanalysis; one-way functions; trapdoor one-way functions; number theory; complexity theory.

Research group in BIOMEDICAL ENGINEERING

RESEARCH TEAM

- Lect. dr. eng. Antonius N. Stanciu
- Lect. dr. eng. Adriana Albu
- Lect. dr. eng. Loredana M. Stanciu

RESEARCH FIELDS

- Friability of Medical Equipments
- Bionics
- Medical Diagnosis and Medical Informatics
- Artificial Intelligence (Expert Systems and Artificial Neural Networks)
- Medical Image Processing
- Human Hand Prosthesis
- Prehension

KEYWORDS

Cochlear implantation; medical diagnosis; expert systems; human hand prosthesis; prehension.

ACTIVITIES

- Testing protocols for patients with cochlear implants
- Development of decisional
- Development of an artificial hand hydraulically actuated

RESEARCH GRANTS

1. *Professional Training of Regional Support Cells for Social and Professional Integration of Deaf Persons with Cochlear Implants*, Grant POSDRU/37/3.2/G/21608; 2009-2011.

2. *Integrated Medical Information Management System Based on HL7 Standard - SIMIMED*, Grant D1-1-019/18.09.2007, 2007-2010, 2nd Romanian National Research Program PN2: Partners in Priority Domains.
3. *TELEASIS – NGN Support-Based, Complex System for Home Tele-Attendance of Elderly People*, Grant 11-066/18.09.2007, 2nd Romanian National Research Program PN2: Partners in Priority Domains.

STRATEGIC PRIORITIES

- Testing protocols for cochlear implantation

- The communication interface between a hand prosthesis and the human body
- Decision-making using Bayesian Networks and Markov Chains
