RESEARCH GROUP IN AUTOMATION AND COMPUTERS

GENERAL PRESENTATION

The main aim of the group is to develop high-level research in the fields of automatic control, computer and software engineering and information technology. It offers the research results in these fields to interested companies and organizations all over the world.

Head of the Research Group: **Prof. Dr. Eng. Stefan PREITL**, recipient of the *Grigore Moisil* Prize of the Romanian Academy for his contribution on fuzzy control.

Tel: +40-256403224, +40-256403229
 Fax: +40-256403214 (at the Dean's office)
 E-mail: stefan.preitl@aut.upt.ro
 Web: <http://www.aut.upt.ro/~spreitl/>

The group is organized in two research divisions:

- *Research Division in Automation and Applied Informatics*

Head of division: **Prof. Dr. Eng. Radu-Emil PRECUP**

- *Research Division in Computer Science and Engineering*

Head of division: **Assoc. Prof. Dr. Eng. Mihai V. MICEA**

RESEARCH DIVISION IN AUTOMATION AND APPLIED INFORMATICS

CONTACT

Prof. Dr. Eng. Radu-Emil PRECUP, recipient of the *Grigore Moisil* Prize of the Romanian Academy for his contribution on fuzzy control.

Research in PROCESS CONTROL

RESEARCH TEAM

- Prof. dr. eng. Stefan Preitl, head of the team
- Prof. dr. eng. Radu-Emil Precup
- Eng. Claudia-Adina Dragoș, PhD student
- Eng. Mircea-Bogdan Rădac, PhD student
- Eng. Daniela Bărbulescu, PhD student
- Eng. Alexandra Iulia Stînean, PhD student

RESEARCH FIELDS

- Conventional control system structures

- Advanced control systems.

KEYWORDS

Fuzzy logic control; iterative methods; data-based control; sliding mode control; intelligent systems; optimization; nature-inspired algorithms; 2-DOF control; stability analysis; sensitivity analysis; robustness; convergence; mobile robots; servo systems; mechatronics applications; embedded systems; signal processing.

MAIN ACTIVITIES

- Development of conventional and advanced control systems
- Signal processing in control systems
- Optimization based on nature-inspired algorithms
- Soft computing in industrial applications
- Development of control systems for servo systems
- Development of control systems for mechatronics and mobile robots

RESULTS

RESEARCH GRANTS AND PROJECTS

National grants and projects

1. Research Grant of the National Centre for Programme Management (CNMP), Type PN2 Partnerships in Priority R&T Domains Programme (2008-2011), no. 12100 / 01.10.2008. Title: *Real-Time Informatics Technologies for Embedded-System-Control of Power-Train in Automotive Design and Applications (SICONA)*, Partners: "Politehnica" University of Timisoara (PUT) – P2, "Gh. Asachi" Technical University of Iasi (TUI) – coordinator, Politehnica University of Bucharest – P1, SC Siemens VDO Automotive – P3. Director: Prof. dr. eng. Cornelius Lazăr (TUI), director of PUT partner (P2): Prof. dr. eng. Radu-Emil Precup (granted value in 2010: 15.642 LEI)

Research team: Prof. Radu-Emil Precup – director of PUT partner (P2), Prof. Stefan Preitl, Assoc. Prof. Florin Drăgan, Lect. Dan Ungureanu-Anghel, Assist. Prof. Daniel Iercan, Assist. Prof. Emil Voîsan, PhD student Mircea-Bogdan Rădac, PhD student Claudia-Adina Dragoş, Teaching Assist. Lucian-Ovidiu Fedorovici.

The main objective of the project consists in developing new informatics technologies for improving the performances of the embedded systems controlling the power train of cars equipped with automated gearboxes. The project applies modern modeling and control strategies to the power-train and its subsystems. On these bases, real-time software modules are developed for the embedded systems, yielding much better operation performances than ensured by the currently used solutions (meaning PID regulation).

Several nonlinear and linearized models and low-cost control solutions have been proposed and tested in 2009 by the research team at the P2 partner. They include Tensor Product-based models, S functions and original design methods dedicated to fuzzy control systems. The digital simulation results show the control-system performance enhancement. Ten papers were presented and/or published in journals and conference proceedings.

PERSPECTIVE DOMAINS

- Methods for the algorithmic design of conventional and intelligent controllers (fuzzy, neural, genetic, sliding mode)
- Methods for signal processing and computer-aided design of control systems
- Analysis and development of intelligent systems
- Solutions for the automatic design of model-free control structures
- Iterative data-based control and nature-inspired optimization
- Control solutions for mechatronics, power systems, electrical drives, general industrial automation, mobile robots

STRATEGIC PRIORITIES

- Control systems with imposed sensitivity
- Tools for computer-aided design of 2-DOF controllers
- Computer-aided techniques in iterative data-based control
- Low cost solutions for control problems dedicated to mechatronics and mobile robots
- Derivative-free optimization in modeling and control design
- Methods and tools to enable the systematic development of fuzzy control systems

RESEARCH FIELDS

- Unconventional energetic
- Wireless sensor networks
- System modeling, identification and simulation
- Neural networks and fuzzy systems
- Adaptive control systems
- Distributed databases

KEYWORDS

Renewable energy; wireless sensor networks; modeling; identification and simulation of systems; neural networks and fuzzy systems; wind energy conversion systems; unconventional energetic; adaptive control; self-tuning; databases.

MAIN ACTIVITIES

- Modeling, simulation and development of wind energy conversion systems (WECS)
- Identification and parameter estimation of electrical machines (asynchronous and synchronous)
- Development of new enhanced electrical machines types
- Development of control systems for WECS
- Control software development in industrial applications
- Modeling and simulation of systems with neural networks
- Development of WECS software
- Development of adaptive control structures
- Applications based on wireless sensor networks
- Development of applications based on distributed databases

RESEARCH GRANTS AND PROJECTS

National grants and projects

1. EEA research grant “*Improvement of the Structures and Efficiency of Small Horizontal Axis Wind Generators with Non-Regulated Blades*”, Grant Type EEA, Contract no. RO0018, Director: Prof. Octavian Prostean, Financial value: 1,200,000 EUR

The proposed project has the research theme, goal and objectives associated to the priority research domains at international level, regarding new small wind generators structures. Thus, the presented project is under the following priority sector: "Protection of the environment, including the human environment, through, inter alia, the reduction of pollution and the promotion of renewable energy", having the focus area on "Developing renewable energy sources, including geothermal energy and hydropower".

Recent documents issued by national and international organizations promote the usage of renewable energy resources Directives of the European Parliament of the Council of the Promotion of Electricity from Renewable Energy Sources in the Internal Electricity Market, Romanian Government Decisions regarding the approval of the renewable energy resources strategies, et. al.

The project has the focus area of developing renewable energy sources, which promote the protection of the environment, by reducing of pollution.

The overall objectives concern the increase of the usage degree of wind-energy conversion systems as

a non-pollutant energy source, conducting to the reducing of carbon and pollution, in concordance to the global trend of ecologic energy production.

The project aims the realization of new/improved small wind generators having presently, high cost price of produced energy in comparison with medium and high power aggregates. This is the reason why USA elaborated (by American Wind Energy Association) the "ROADMAP 20-year industry plan for small wind turbine technology" that aims the drastically reduction of the present energy cost. The project has in view all elements of small wind generators. The project's beneficiary is able to organize the research and implementation of the project that will certainly lead to the efficientization and to the reducing of the cost of such types of wind generators. The beneficiary has relevant experience in the field, and the human resources are specialized in all required domains: wind turbines, mechanical systems, electrical generators, power electronic converters, control systems, project management.

"Politehnica" University of Timisoara has a long-term experience inclusively in the domain of small power wind generators: for a Canadian corporation (vertical axis wind turbine) and for Romanian users (horizontal axis wind turbines). In Timisoara there are factory equipped with necessary technologies for such aggregates.

PERSPECTIVE DOMAINS

- Real time control of induction and synchronous machines using LabView (LabWindowsCVI), the National Instruments Data Acquisition Systems and DSpace hardware
- Advanced control of wind aggregates
- Neural network control systems

STRATEGIC PRIORITIES

- Study of innovative control systems for wind aggregates: MPPT methods, genetic algorithms
- Tools for statistical wind measurement related data, for short-term forecasting used in wind speed prediction based windmill control systems and for simulation of autonomous wind farms aggregates

RESEARCH GRANTS AND PROJECTS

1. *TELEASIS – NGN support-based, Complex System for home tele-attendance of elderly people*. 2nd Romanian National Research Program PN2

Participants: academic, research and medical organizations and SME's from București, Timișoara, Iași, Pitești. Local staff: Lăcrămioara Stoicu-Tivadar, Vasile Stoicu-Tivadar, Dorin Berian, Romina Pintea, Raul Robu, Andreea Robu, Vasile Topac ("Politehnica" University of Timișoara).

The main objective of the project is the development of a tele-support system for elderly people, from medical and social perspective, as well. This system has as a goal the implementation and development of the social and medical support services of elderly people, at their homes, in accordance with the fulfillment of the requirement of this category, to live in their own homes not in asylum. In this way, the project contributes to

increase the active live duration of the people, and to optimize the customized management of the way of life of the assisted person.

The planned R&D activities:

- an experimental model for a specific local intelligent unit for the homes of the elderly people
- an experimental model for the Teleassistance Centre
- the telecare network
- the specific database and the required software solutions
- a model of tele-attendance services
- a complete guide of the developed know-how and technology.

The project has contributed to the development of knowledge related to NGN networks, and middleware technologies, to the development of the complex tele-attendance software systems.

2. *SIMIMED - Integrated medical information management system based on HL7 Standard.*
2nd Romanian National Research Program PN2

Participants: academic and medical organizations and SME's from Cluj, Timișoara, and Brașov. Local staff: Lăcrămioara Stoicu-Tivadar, Vasile Stoicu-Tivadar, Dorin Berian, Romina Pintea, Raul Robu, Andreea Robu, Vasile Topac ("Politehnica" University of Timișoara).

The main objective of the project is the research, design and implementation of a pilot integrated system development for the management of the patients, human and material resources in a hospital (Hospital Information System – HIS), based on the more advanced Standards from the medical informatics domain - HL7, DICOM, EN 13606, adapted to the needs of the Romanian Healthcare system.

The planned R&D activities:

- The analysis of the actual context and the general design
- The technical specifications definition for the HIS
- The development of the kernel of the HIS, including the compliance with HL7 Standard
- The design and the implementation of the software modules for each medical specialty
- The design and development of HL7-compliant communication interfaces with other Healthcare information systems
- The enlargement of the partnership with other medical organizations in order to implement the results of the project.

The project developed a modular and flexible solution that can be adapted to any Healthcare

organization, and integrated with other existing Healthcare Information systems.

PERSPECTIVE DOMAINS

- a. Distributed architectures and appropriate technological solutions
- b. Mobile applications and related technologies
- c. Interoperability standards in distributed medical informatics
- d. Solutions for integrated healthcare networks and interoperability

STRATEGIC PRIORITIES

The group intends to develop strategic researches on the directions specified in the domain by the European Community:

- The Education and Training of high level healthcare managers and policy makers on the strategic role of ICT in Healthcare and change management
- To implement programs on education and training, and other actions to promote awareness and to reduce resistance to change of healthcare professionals
- To set up specific awareness actions addressing sensitive groups, such as: academic circles, high reputation specialists at university hospitals and other local medical opinion leaders, clinical research groups, medicine and nursing students
- To improve mutual learning through information interchange, particularly to avoid cultural mismatches, to promote and encourage cross-border cooperation on e-Health topics and applications.

Researches in REAL-TIME CONTROL SYSTEMS

RESEARCH TEAM

- Prof. dr. eng. Nicolae Robu, head of the team
- Prof. dr. eng. Gheorghe-Daniel Andreescu
- Prof. dr. eng. Toma-Leonida Dragomir
- Prof. dr. eng. Ioan Silea
- Lecturer dr. eng. Sorin Nanu
- Assist. eng. Ana-Maria Dan
- Assist. eng. Tiberiu Ionică
- Eng. Mihai Iacob, PhD student

- Eng. Coman Cristina Elena, PhD student
- Eng. Gurban Eugen Horațiu, PhD student

RESEARCH FIELDS

- Advanced Control of AC drives: Sensorless Control of IPMSM; Fault-tolerant Control
- Automotive Electric Actuation Technologies
- Applications to Electric and Hybrid Vehicles
- Boiler-Turbine Control System
- Solar Energy
- Informatics Systems, SCADA

KEYWORDS

- Advanced control; Electric drives; Automotive electric actuation; Sensorless control; State and disturbance observers; Variable structure flux-observer, Signal injection; Active flux observer; Fault-tolerance; Boiler-turbine control; Hardware-in-the-Loop, Fuzzy-interpolating implementation, Wind energy; Solar energy, Informatics systems, SCADA, Real-time implementations.

MAIN ACTIVITIES

- Control systems in Automotive electric actuation technologies
- SCADA system for a central heating and power plant
- Boiler-turbine control system with real-time capability for dispatcher training using LabView
- Enhancement sensorless control system for PMSM drives using square-wave signal injection including zero speed
- Active-flux based motion sensorless control of biaxial excitation generator for automobiles (BEGA)
- Novel position and speed estimator for PM single phase brushless dc motor drives
- Fast dynamics V/f sensorless control of PM-RSM drives
- Real-time implementation and testing using DSpace for Sensorless control of AC drives
- Informatics systems
- Solar energy

RESEARCH GRANTS AND PROJECTS

1. *ICT-eMuCo: Embedded Multi-Core Processing for Mobile Communication Systems* director Cretu V.-I., team: Ciocarlie H., Marcu M., Micea M., Tudor D., Jebelean C., Macariu G., Contract No: 216378/1 Feb. 2008; financed by: EU; UPT value 74.300 EUR.

2. *MELISSEVS: Dezvoltarea si analiza unui model integrat de reprezentare a sistemelor colaborative robotice si de senzori inteligenți in aplicatii de explorare-supraveghere de mediul director Micea M.V.*, team: Cretu V.-I., Chiciudean D., Cioarga R., Stratulat B., Contract No ID_22/2007-2010, Contract No. 58/01.10.2007; financed by: UEFISCSCU, MEdCI; UPT value 100.926 RON.

3. *SICRAMAS: Sistem inteligent de conducere neliniara robust-adaptiva dupa fluxul rotoric a actionarilor cu motoare asincrone* director Micea M.V., team: Cretu V.-I., Stratulat M., Micea C., Miclea F., Cioarga R., Ciubotaru B., Chidiucean D., Stanescu D., Contract No. PDP_2306, Contract nr. 71-065/18.09.2007; financed by: UEFISCSCU, MEdCI; UPT value 30.000 RON.

4. *FILOLET Innovative System for Electrical Energy Monitoring Based on Wavelet Transformation for Industrial Consumers*, director Micea M. V., team: Cretu V.-I., Stratulat M., Micea C., Miclea F., Cioarga R., Chidiucean D., Stanescu D., Stratulat B., Stratulat I., Contract No PDP_4339, Contract No. 22-137/01.10.2008; financed by: UEFISCSCU, MEdCI; UPT value 6.500 RON.

5. *MERLIN: Platforma IT de Modelare, Simulare, Planificare si Optimizare a Productiei Automatizate in Industria Semiconductorilor*, Cretu V., Micea M. V., Contract No. PDP_1262, Contract No. 198/12.09.2008; financed by: UEFISCSCU, MEdCI; UPT value 23.580 RON.

6. *FALX DACIAE: Unelte si Procese de Dezvoltare SW pentru Aplicatii Multimedia Avansate pe Arhitecturi Multi-Core pentru Telefoane Mobile*, project manager: M. V. Micea, team: V. I. Cretu, M. Vladutiu, H. Ciocarlie, D. Todinca, L. Prodan, M. Udrescu Milosav, R&D Grant POSCCE-499-11844/2010-2012, EU - Structural Instruments, ANCS Contract 133/04.06.2010. Total value: 2126766 RON (~ 506400 EUR). Value, PUT Partner: 1143416 RON (~ 272300 EUR).

AUTONOMOUS RESEARCH GROUPS

DEPARTMENT OF AUTOMATION AND APPLIED INFORMATICS

MAIN RESEARCH FIELDS

- System theory applications in fault detection and diagnosis
- System analysis using sensitivities
- Development of control system devices
- Interpolative, fuzzy and neural systems
- Virtual instrumentation in control
- Control of electrical drives
- Time-delay systems
- Biomedical modeling
- Quality Management

Research group in APPLIED SYSTEMS THEORY

RESEARCH TEAM

- Prof. dr. eng. Toma-Leonida Dragomir, head of the team
- Prof. dr. eng. Constantin Voloșencu
- Lecturer dr. eng. Dorina Popescu
- Lecturer dr. eng. Sorin Nanu
- Assist. eng. Ana Maria Dan
- Lecturer dr. eng. Adrian Korodi
- Eng. Flavius M. Petcuț, PhD Student
- Eng. Alexandru Codrean
- Eng. Vlad Ceregan
- Student Ioana Jivet
- Student Angela Timofte

MAIN RESEARCH FIELDS

- System theory applications in fault detection and diagnosis
- System analysis using sensitivities
- Development of control system devices
- Interpolative, fuzzy and neural systems
- Virtual instrumentation in control
- Control of electrical drives
- Time-delay systems
- Management of the innovation and creativeness
- Sensor networks
- System identification
- Modeling the cardiovascular system with its nervous control
- Modeling of photovoltaic systems

KEYWORDS

Fault detection; identification and diagnosis; modeling; system safety and availability; controller design; process control; interpolating strategies; fuzzy logic; neural networks; control of electrical drives; virtual instruments; sensor networks; system

identification; time-delay systems; cardiovascular system; nervous control.

RESULTS

Research group in BIOMEDICAL ENGINEERING

RESEARCH TEAM

- Lect. dr. eng. Antonius N. Stanciu
- Lect. dr. eng. Adriana Albu
- Lect. dr. eng. Loredana M. Stanciu

RESEARCH FIELDS

- Friability of Medical Equipments
- Bionics
- Medical Diagnosis and Medical Informatics
- Artificial Intelligence (Expert Systems, Artificial Neural Networks)
- Medical Image Processing
- Human Hand Prostheses
- Prehension

KEYWORDS

Cochlear implantation; medical diagnosis; expert systems; human hand prosthesis; prehension

ACTIVITIES

- Testing protocols for patients with cochlear implants
- Development of decisional systems
- Development of an artificial hand hydraulically actuated

PUBLISHED PAPERS

1. Albu A., Pamintas E., Banciu F., Carausu C., Ruset V., Belgiu G., *Turn-Milling Process Parameters Optimisation Using an Artificial Intelligence System*, Proc. 14-th International Conference Modern Technologies, Quality and Innovation-New face of TMCR (ModTech 2010), Slanic-Moldova, Romania, ISSN 2066-3919, May 2010, pp. 23-26.

2. Belgiu G., Mee R., Ruset V., Carausu C., Albu A., *Molded Plastic Part Analysis, Reasoning and Optimisation using CAD-CAE System*, Proc. 14-th International Conference Modern Technologies, Quality and Innovation -New face of TMCR (ModTech 2010), Slanic-Moldova, Romania, ISSN 2066-3919, May 2010, pp. 111-114.

RESEARCH GRANTS

1. *Professional Training of Regional Support Cells for Social and Professional Integration of Deaf Persons with Cochlear Implants*, Grant POSDRU/37/3.2/G/21608, 2009-2010.

STRATEGIC PRIORITIES

- Testing protocols for cochlear implantation
- The communication interface between a hand prosthesis and the human body
- Decision-making using Bayesian Networks and Markov Chains
