

Procedures and criteria for evaluation and recognition of student's progress within course activities during the semester
Civil Engineering- Politehnica International Programme (4 year bachelor), 1st, 2nd years

Didactic mission of the educational program	Achievement of the basic and specialty engineering training for the design and erection of civil, industrial and agricultural constructions.
Research mission of the educational program	Formation of ability and accumulation of knowledge adequate for the erection, design or research activity in the field of civil, industrial and agricultural construction, as well as in view of professional improvement by master study (oriented on research) or PhD study.

Crt. No.	Year of study	Course name	Evaluation procedures and criteria (written/oral examination, / colocvium, No. of examiners, No. of questions, evaluation criteria, requirements for minimum mark, requirements for maximum mark, evaluation conditions setup)	Quantification/recognition of the student progress/activity during the semester
1.	I	Mathematics1	<ul style="list-style-type: none"> • Written exam • 2 examiners • 10 questions: theoretical knowledge (4 questions) and problems solving (6 questions), • Final mark : 2/3*(1/3 theoretical knowledge + 2/3 problems solving)+ 1/3 seminar activity • Mark 5 : minimum 5 at theoretical knowledge, minimum 5 at problems solving and minimum 5 at seminar activity • Mark 10 : arithmetical mean greater than 9.5. • Provided by the faculty. 	<ul style="list-style-type: none"> • 50% partial exam (considered until the graduation)
2.	I	Mathematics2	<ul style="list-style-type: none"> • Written exam • Two examiners • The final mark is: 0,66% (1/3 theoretical knowledge + 2/3 problems solving) + 1/3 seminar activity • The seminar mark is the arithmetical mean of the marks for attendance, for answers to the seminars and for test papers. • The examination test contains two theoretical subjects and two applicative problems. • The mark of examination test is the arithmetical mean of the marks for each subject, provided that each of these marks to be at least five. • Mark 5:minimum 5 at each theoretical and applicative subject of examination test and mark 5 at seminar. • Mark 10 :final mark greater than 9.5 • Provided by the Faculty. 	<ul style="list-style-type: none"> • 50% partial exam and homework that counts in final mark (considered until the graduation)
3.	I	Surveying (Geodesy)	<ul style="list-style-type: none"> • Written examination • 2 examiners from the faculty • 5 subjects 	<ul style="list-style-type: none"> • The acknowledge of the quality of learning during the semester is done by 3 home reports and also orally examination during the laboratory

Crt. No.	Year of study	Course name	Evaluation procedures and criteria (written/oral examination, / colocvium, No. of examiners, No. of questions, evaluation criteria, requirements for minimum mark, requirements for maximum mark, evaluation conditions setup)	Quantification/recognition of the student progress/activity during the semester
			<ul style="list-style-type: none"> • Mark 5 implies minimum approach of all subjects • Mark 10 implies a competent approach of the requested problems, proving a good and logical understanding of the discipline • The evaluation proceeds in the topographic lab., usually 	<p>hours</p> <ul style="list-style-type: none"> • The weight for the lab. evaluation represents 50% out of the final mark. • The marks are acknowledged until the graduation. • Semester exam with 50% weight for laboratory activities.
4.	I	General Chemistry	<ul style="list-style-type: none"> • Written examination with partial examination after the first 7 lectures • 2 examiners • 8 questions (4 from the first part, 4 from the second part). Each question can have between 1 and 4 points, depending on their degree of difficulty. • Final mark: $2/3 \cdot \text{exam} + 1/3 \cdot \text{lab}$; Marks for the examination and activity during the semester are expressed with 2 decimals. The average is calculated according to the RODPI of UPT • Mark 5: minimum 5 at the written exam and at least 5 at the activity during the semester (laboratory) • Mark 10: the average between written examination and activity during the semester should be at least 9.50 • Lecture rooms assigned by the faculty 	<ul style="list-style-type: none"> • 50% partial exam (considered until the graduation) • Grades ≥ 5 for the exam and grades ≥ 5 for the activity during the semester are recognized until graduation
5.	I	Introduction to Computer Programming	<ul style="list-style-type: none"> • Distributed evaluation: • Two practical tests which are held in a laboratory room. The average of these practical tests represents 50% from the final mark. • One Multiple choice evaluation with 30 questions. Minimum 2 supervisors. Each question has 5 possible answers, only one correct. The mark 5 means 50% correct answers, the mark 10 means 100% correct answers. The mark from the multiple choice test represents 50% from the final mark. The multiple choice test will be held in a course room. • The final mark will be computed if the marks from the multiple choice and the practical tests are equal or grater than 5 and will be rounded according RODPI of UPT 	<ul style="list-style-type: none"> • The marks equal or grater than 5 for the exam and for the laboratory activity will be recognized unconditionally at any moment.
6.	I	Culture and Civilization	<ul style="list-style-type: none"> • Written examination • 2 internal supervisors; • 9 theoretical subjects, one point each (1 point from the start) • Homework: one essay on a topic (of choice) referring to European culture; the essay should be submitted in a written form and also presented during the seminars; • The quality of the essay and its presentation will be reflected in the grade for the activity during the semester; others issues reflected in the grade for the activity during the semester: the quality of answers and participation during the seminars. • The final grade is calculated as simple average of the grade for the activity during the semester (50%) and the grade for the exam (50%), rounded according to the RODPI of UPT; the grade for the exam is not rounded (it is expressed as a real number, with 2 decimals; the grade for the activity during the semester is expressed without decimals. 	<ul style="list-style-type: none"> • Grades ≥ 5 for the exam and grades ≥ 5 for the activity during the semester are recognized unconditionally, at any moment. • If the students consider it useful, a partial examination is established after the 7th week (and prior to the 11th week). The grade obtained for the partial examination will be considered, for the final exam, instead of the answers for the subjects from the first part of the discipline (the first 7 chapters). Therefore, if in the final exam there are 5 (4) subjects from the first seven chapters, for those 5 (4) subjects the number of points will be the grade from the partial

Crt. No.	Year of study	Course name	Evaluation procedures and criteria (written/oral examination, / colovcium, No. of examiners, No. of questions, evaluation criteria, requirements for minimum mark, requirements for maximum mark, evaluation conditions setup)	Quantification/recognition of the student progress/activity during the semester
			<ul style="list-style-type: none"> The grade 5 is obtained for promoting the exam with a grade higher or equal to 5 and obtaining a grade for the activity during the semester higher or equal to 5. The grade 10 is obtained for a grade for the exam higher or equal to 9 (if the grade for the activity during the semester is 10) and respectively for the grade 10 for the exam (when the grade for the activity during the semester is 9); The examination is held in the classrooms decided by the faculty's executive board. 	<ul style="list-style-type: none"> examination multiplied with 0.5 (0.4). For students who passed the examination (with a grade higher than 5) and who are willing to increase their grade, partial examinations can be accepted for the second and the third presentation (the students can answer only to the subjects referring to the part (the chapters) for which the initial answers were wrong/incomplete.
7.	I	Second language 1 (French)	<ul style="list-style-type: none"> Continuous assessment 2 internal examiners Final test represents ½ of the final mark; 3 practical questions Mark 5 is given for proof of having acquired the language skills taught and using them at a minimum level; Mark 10 is given for the full acquisition of the language skills taught and for proof of the ability to use them Classroom given by the faculty 	<ul style="list-style-type: none"> The marks obtained at the final test and for the activity during seminars are valid until the course is passed
8.	I	Second language 1 (German)	<ul style="list-style-type: none"> Continuous assessment 2 internal examiners Final test represents ½ of the final mark; 3 practical questions Mark 5 is given for proof of having acquired the language skills taught and using them at a minimum level; Mark 10 is given for the full acquisition of the language skills taught and for proof of the ability to use them Classroom given by the faculty 	<ul style="list-style-type: none"> The marks obtained at the final test and for the activity during seminars are valid until the course is passed
9.	I	Sport1	<ul style="list-style-type: none"> Colloquium exam. The titular professor assures the evaluation of the activity. The student must participate rhythmically and actively to the lessons and competitions organized in the Department of Physical Education and Sport The grade „Admitted /Rejected” is conditioned by the 100% participation of the lessons. 	<ul style="list-style-type: none"> During the semester, there are a few tests that students must fulfil. These tests are recognised and reflected in the final grade.
10.	I	Experimental Data Processing	<ul style="list-style-type: none"> Distributed assessment. Two written tests, the average of which is half of the final mark; the other half is the mark for the hole semester activity. A passing mark is obtained only if the average of the two tests is at least 5. The maximum mark (10) is obtained for properly solving 90% of the subjects. Room assigned by the executive board of the faculty. Exam subjects multiplied for each student. Two internal examiners 	<ul style="list-style-type: none"> Marks of at least 5 (both for the "exam" and for the activity) are recognized unconditionally at any moment.
11.	I	Practice 1	<ul style="list-style-type: none"> Evaluation is based on a report in a written form and on the answers to the committee questions The committee is composed of 3 examiners; The report should contain the detailed description of all activities done in the practice period. The activities are grouped based on schemes corresponding to each year; 	<ul style="list-style-type: none"> The grade recognized until the graduation of the group

Crt. No.	Year of study	Course name	<p style="text-align: center;">Evaluation procedures and criteria</p> <p style="text-align: center;">(written/oral examination, / colcviium, No. of examiners, No. of questions, evaluation criteria, requirements for minimum mark, requirements for maximum mark, evaluation conditions setup)</p>	<p style="text-align: center;">Quantification/recognition of the student progress/activity during the semester</p>
			<ul style="list-style-type: none"> • The schemes and the allocated no. Of points for each activity are posted on the faculty web page; • Grading: It is given the grade admitted or rejected based on the quality of answers and on the written report. The report should get a minimum of 25 points of a total of 50 points in order to pass the examination; • The examination is held in the classrooms decided by the faculty's executive board 	
12.	I	Mathematics 3	<ul style="list-style-type: none"> • Written exam; • Two examiners; • The final mark is computed as arithmetical mean of the examination mark and the seminar mark, provided that each of these marks to be at least five. • The seminar mark is the arithmetical mean of the marks for attendance, for answers to the seminars and for test papers. • The examination test contains two theoretical subjects and two applicative problems. • The mark of examination test is the arithmetical mean of the marks for each subject, provided that each of these marks to be at least five. • The examination is held in the classrooms decided by the faculty's executive board • Mark 5: minimum 5 at each theoretical and applicative subject of examination test and mark 5 at seminar. • Mark 10 :final mark greater than 9.5 	<ul style="list-style-type: none"> • The recognition of the students progressive accumulation consists of: • Partial exam • Seminar activity • Homework • All the marks greater than or equal to five for the entire activity are recognized till the graduation of faculty.
13.	I	Mathematics 4	<ul style="list-style-type: none"> • Distributed evaluation – two parts cont in written examination, the first examination in 7th week and the second in 12th week; • 2 internal supervisors; • 4 subjects: 1 theoretical subject and 3 problems, 3 points for each subject, the student must choose 3 subjects from these four subjects. The note is calculated directly from the points of each subject (between 0 and 3 points); • The examination note is calculated as simply average of the notes obtained after there two parts of evaluation; • The activity grade is simply average of two notes, one note from seminars obtained follows one test paper and the student's activities in solving problems at the blackboard, and respectively one note from the laboratory compound from one test on computer and the student's activities at the laboratories; • The final grade is obtained as the simple arithmetical average of the note for written examination and the note for the student's activity; • The grade 5 is obtained for the promoting the exam with a grade grater or equal than 5 (the average of there two notes) and the obtaining a grade for the activity during the semester higher or equal to 5; • The grade 10 is obtained for a grade for the exam higher or equal to 9 (if the grade for the activity during the semester is 10) and respectively for the grade 10 for the exam (when the grade for the activity during the semester is 9); • The examination is held in the classrooms decided by the faculty's executive board. 	<ul style="list-style-type: none"> • Grades grater or equal than 5 for the exam and similarly for the activity during the semester are recognized unconditionally, at any moment. • For students who passed the examination (with a grade higher than 5) and who are willing to increase their grade, partial examinations can be accepted for the second and the third presentation (the students can answer only to the subjects referring to the part (the chapters) for which the initial answers were wrong/incomplete.
14.	I	Material Science1	<ul style="list-style-type: none"> • Written exam • Minimum 2 internal examiners • 3 theoretical subjects (each covering 33.3% of total theoretical course) • 5 mark for solving 50% of subjects and for practical work at laboratory minimum 5 	<ul style="list-style-type: none"> • Marks obtained during laboratory works

Crt. No.	Year of study	Course name	Evaluation procedures and criteria (written/oral examination, / colocvium, No. of examiners, No. of questions, evaluation criteria, requirements for minimum mark, requirements for maximum mark, evaluation conditions setup)	Quantification/recognition of the student progress/activity during the semester
			<ul style="list-style-type: none"> 10 mark it is obtained for solving subjects 100% and to have 10 mark at the laboratory The room it is established by dean compartment 	
14.	I	Mechanics	<ul style="list-style-type: none"> Formal written examination; Examiners: 2 members ; one belonging to the teaching staff; the other being a trainer for doctor's degree at "Politehnica" University Examining subjects: 2 of theoretical field and 3 applications; There exist a relationship imposed by the University Board devoted to the student's mark Integer $[k_1 \times E + k_2 \times A + 0.5]$ (1) Where $k_1 = 0.66$; $k_2 = 0.34$; E = examination mark ; A = mark obtained during the application hours; The mark 5 is adapted if the result of the relationship (1) is equal or greater than 4.60; The mark 10 is adapted if the result of the relationship (1) is equal or greater than 9.60 Any subject passed is recognized until the closing student's situation; The credits allocation is conditioned by mark 5 of the term evaluations; The Faculty border planes the classroom for the exam; 	<ul style="list-style-type: none"> Partial examination 40% weighted, the marks recognized until the closing student's situation; Written tests 10% weighted, during the term;
15	I	Physics	<ul style="list-style-type: none"> Written exams, in two phases, with at least one assistant: 1.first, 40 questions regarding the units of measure and significance of the physical quantities learned. To go to the second phase, one needs 30 correct answers; 2. The second phase involves a multiple choice questionnaire with 25 exercises each having 5 answers, but only one is correct. A minimum of 12 correct answers is needed. To pass, one needs 30 correct answers in the first phase and 12 from the second phase, with 5 proves to justify the answers. To get 10, one needs at least 35 correct answers from the first phase, and at least 20 from the second phase, with a minimum of 18 proves to justify the answers. <p>N.B. The exam has a weight of 2/3 in the final mark, labs and seminars having 1/3.</p>	<ul style="list-style-type: none"> Labs and seminars have a weight of 1/3 in the final mark. Regarding labs, the students must have all the asked works, the marks being awarded as a function of the quality of work. Seminars are one at every two weeks, so a dense oral evaluation of the knowledge of each student is not possible, their number being 45. The students must solve at least 3 homework.
16.	I	Applied Computer Programming	<ul style="list-style-type: none"> Distributed evaluation: Two practical tests which are held in a laboratory room. The average of these practical tests represents 50% from the final mark. One Multiple choice evaluation with 30 questions. Minimum 2 supervisors. Each question has 5 possible answers, only one correct. The mark 5 means 50% correct answers, the mark 10 means 100% correct answers. The mark from the multiple choice test represents 50% from the final mark. The multiple choice test will be held in a course room. The final mark will be computed if the marks from the multiple choice and the practical tests are equal or grater than 5 and will be rounded according RODPI of UPT. 	<ul style="list-style-type: none"> The marks equal or grater than 5 for the exam and for the laboratory activity will be recognized unconditionally at any moment.

				graduation.
33.	II	Mechanics of Materials 2	<ul style="list-style-type: none"> • Written examination,; • 2 examiners; • 5 questions: 2 theoretical and 3 applications; marks from 1 to 10, • All questions must be noted with minimum 5 to promote the exam with 5; • The exam mark represent 2/3 from the final quotation, while 1/3 is the mark given during the semester as an average mark of the tests given in this period. • These 2 marks must be minimum 5 in order to promote the discipline. • The examination is held in the classrooms decided by the faculty's executive board 	<ul style="list-style-type: none"> • It is assured by the tests given during the semester. Also, a partial exam is given in the 8th week of each semester. The quotation of this exam, which must be minimum 5, represents 50% from the final quotation.
34.	II	Microeconomics	<ul style="list-style-type: none"> • Written examination • 2 internal supervisors; • 6 theoretical subjects, one point each, and one application of 3 points (1 point from the start) • Homework: one case-study – calculating some economic indicators for a real company; • The grade for the activity during the semester is based on the case-study and on a test organized during the semester; also, the quality of answers and the level of implication during the seminars have an influence on the grade for the activity during the semester. • The final grade is calculated as weighted average of the grade for the activity during the semester (40%) and the grade for the exam (60%), rounded according to the RODPI of UPT; the grade for the exam is not rounded (it is expressed as a real number, with 2 decimals; the grade for the activity during the semester is expressed without decimals. • The grade 5 is obtained for promoting the exam with a grade higher or equal to 5 and obtaining a grade for the activity during the semester higher or equal to 5. • The grade 10 is obtained for a grade for the exam higher or equal to 9,2 (if the grade for the activity during the semester is 10) and respectively for the grade 10 for the exam (when the grade for the activity during the semester is 9); • The examination is held in the classrooms decided by the faculty's executive board. 	<ul style="list-style-type: none"> • Grades ≥ 5 for the exam and grades ≥ 5 for the activity during the semester are recognized unconditionally, at any moment. • If the students consider it useful, a partial examination is established after the 7th week (and prior to the 11th week). The grade obtained for the partial examination will be considered, for the final exam, instead of the answers for the subjects from the first part of the discipline (the first 7 chapters). Therefore, if in the final exam there are subjects worth 5 (4) points, for those subjects the number of points will be the grade from the partial examination multiplied with 0.5 (0.4). • For students who passed the examination (with a grade higher than 5) and who are willing to increase their grade, partial examinations can be accepted for the second and the third presentation (the students can answer only to the subjects referring to the part (the chapters) for which the initial answers were wrong/incomplete.
35.	II	Building Engineering Fundamentals	<ul style="list-style-type: none"> • Evaluation method: written examination comprised of three theoretical questions and one practical assignment • Evaluation method for activity during the semester activity: several homework showing progress of project assignments, written class assignments • Final grade: 60% final exam, 40% semester activity • Number of examiners: two • Grading criteria: understanding of the principles of the course subject, clearness in explanations, capacity to demonstrate the results and the way the answer is organised • Conditions for grade 5: the grade for the final exam is obtained by taking the average of the grades for theoretical questions and for the practical assignment, with the condition that both grades are larger than 5 • Conditions for grade 10: 100% compliance with the grading criteria 	<ul style="list-style-type: none"> • Semester activity has a share of 40% from the final grade • The grade recognized until the graduation of the group
