

EEA Grants Mobility Project in Higher Education:  
19-MOB-0025

Mobility type: Teaching

Field: 0521 – Environmental sciences

Home university: Politehnica University Timișoara  
(RO TIMISOA04)

Host university: University College for Green  
Development (N STAVANG09)

Period: 25.08.2022 – 31.08.2022

---

*Norway experience for me was different from other teaching or training mobilities that I had before, mainly because of the people and the inspiring landscape. From the first day, two words describing the atmosphere of the city and its surroundings, that come into my mind are: tranquillity and calm.*

*I spent the first days at the school with Professor Johan Barstadt and Maria Helene, visiting the facilities of the university. Prof. Johan is the head of the department of the University College of Green Development.*

*Even before the covid, in the University College of Green Development, they were having mixed classes, online and physical. They have students from all over Norway and for them arriving to school is quite difficult in winter, because of the snow and big distances. Hybrid classes were very successful in order to help the students.*

*The topics of the talks and small lectures were mainly about: green development, green energy, energy saving, green roof, timber structures, building techniques, climate change, nature, and environmental measures. Each subject was developed with short presentations and examples.*

*In the last day I had the opportunity to be invited to a meeting in the International House from Oslo, with Jørn Lein-Mathisen (Founder International House) and Rita Anson (Project Manager Oslo International Hub), to discuss future Erasmus and EEA Grant opportunities.*

*This mobility broadened my field of interest, taking more into the account multidisciplinary and developing new projects and ideas for future collaborations with the University College of Green Development.*

*Lect. Anamaria-Andreea ANGHEL*
