- Sprijinirea cercetătorilor în toate etapele carierei lor și **promovarea dezvoltării carierei în cercetare și inovare**
- Folosirea dinamică a capitalului intelectual al Europei, în scopul **generării de cunoaștere, inovare și noi aptitudini**
- Dezvoltarea unor proiecte inovative, compatibile cu cerințele de **competitivitate și interdisciplinaritate** ale cercetării și inovării
- Parteneriate cu Statele Membre prin mecanismul de cofinanțare

- ❖ **Toate domeniile științifice sunt eligibile** (abordare “bottom-up”)
- ❖ 8 paneluri de evaluare standard :
 - Chemistry (CHE),
 - Social Sciences and Humanities (SOC),
 - Economic Sciences (ECO),
 - Information Science and Engineering (ENG),
 - Environment and Geosciences (ENV),
 - Life Sciences (LIF),
 - Mathematics (MAT),
 - Physics (PHY)

- **Paneluri multidisciplinare:**
 - Reluarea carierei,
 - Reintegrare,
 - Societate&întreprinderi

- ❖ **Mobilitate transnațională** – criteriu de eligibilitate
- ❖ **Participarea sectorului economic** este puternic încurajată (întreprinderi, IMM-uri)
- ❖ Fără limită de vârstă : **“senior researcher” (>10 ani experiență) eligibil**
- ❖ Promovează condiții de muncă și angajare atractive: **plafoane minime OBLIGATORII stabilite prin Programul de lucru**
- ❖ La data termenului limită al apelului/recrutării, **cercetătorul să nu fi avut reședința sau să nu își fi desfășurat activitatea de bază (muncă, studii) în țara organizației gazdă pentru mai mult de 12 luni din ultimii 3 ani imediat anteriori datei de referință.**

❖ Organizații:

– **BENEFICIARI** (semnatarii grantului) și **ORGANIZAȚII PARTENERE**

– Sectoare:

- **Academic** = universități publice sau private, organizații de cercetare non-profit publice sau private, organizații internaționale de interes european
- **Non-academic** = orice actor socio-economic neinclus în sectorul academic; implicarea industriei, în sens larg: participarea agenților economici (inclusiv a IMM-urilor) și a altor actori socio-economici

❖ Cercetători, în funcție de nivelul de experiență în cercetare

Aspecte generale Acțiunile Marie Skłodowska Curie

- Care este nivelul de experiență în cercetare?
- Definiții utilizate în Programul de lucru:
 - **Cercetători debutanți (Early stage researchers- ESR)** = fără doctorat obținut sau <4 ani experiență în cercetare (normă întreagă)
 - **Cercetători cu experiență (Experienced researchers- ER)** = cu doctorat sau > 4 ani experiență în cercetare (normă întreagă)

Experiența în cercetare se calculează de la data obținerii unui titlu/diplome care ar permite accesul la doctorat

Evaluare

➤ Criteriile de evaluare:

1. Excelență	2. Impact	3. Calitatea și eficiența implementării proiectului
50%	30%	20%

- Experți evaluatori independenți
- Rezultatele evaluărilor: max. 5 luni de la data limită
- Semnarea acordului de grant: max. 8 luni de la data limită

→ What Evaluators expect

- Well-organised, “flowing” text. Proposal should make the Evaluator’s “life” easier: consistent, well-written, following guidelines/templates.
- Proposal should help the Evaluators score it more easily: “built” around the Evaluation Criteria.
- Proposal has to convince that it will add value in the specific field, for the **Career Development** of the Researcher and the EU at large.
- Clear description of the content and structure of the Training Programme, as well as of the Quality of the Supervision.
- Clear Work Plan with **Contingency Planning**, **IPR management considerations**, and **Outreach/Dissemination Plans**.

IF Survivor Guide 2016

All you need to know to survive with the MSCA IF call summarised in this Guide by MSCA NCP

IF Survivor Guide 2016

What evaluators expect ...

- Evaluators don't have too much time... Keep it simple and concise
- Always revisit the Criteria-questions... Stay within “Scope”
(→ copy from Documentation and work around it)
- No duplications of previous works/projects, but... building on them
- Clear language and organised contents
- Explain abbreviations / Use Glossary
- Use tables and diagrams (relevant and easily understandable)
- Use Structure and Table-of-Contents from Templates...Use Headings and subheadings from Templates...

To better showcase the above, please find below some **actual remarks by Evaluators, regarding 1.1**, recorded in Evaluation Summary Reports of past years:

- as **"Strengths"**:

- The Proposal provides a good overview of the main objectives of the project.
- The state-of-the-art is presented in a clear and concise manner and the research objectives are convincingly explained.
- The objectives of this relevant project are clearly defined and outlined against the state-of-the-art of the background.
- Sufficient bibliographical references are provided to place each research objective in the context of the general state-of-the-art.
- The state-of-the-art is introduced in a comprehensive and timely overview taking into account the most recent developments and controversies.
- The Introduction, state-of-the-art, objectives and overview of the action are very well defined and clearly described.

- as **"Weaknesses"**:

- The Proposal does not give a sufficient description of the state of the art in the field.
- The Proposal describes the adopted methodological approach to achieve the expected goals, without focusing in detail on the interdisciplinary aspects.
- The methodological approach is not elaborated in sufficient detail.
- The originality of the research concept is not put forward strongly enough with a clear discrimination between this Proposal and former or current projects at the host institution or collaborators.
- The innovative aspects of the research are not fully demonstrated: the planned approach is not really new in the field.
- The definition of an "ABC" is very interesting but extremely challenging theoretically and conceptually: the candidate does not provide sufficient elements to judge whether the methodology to be followed will be appropriate for such a demanding task.
- The Proposal does not describe in depth the methods that will be employed for estimating the parameters for "XYZ".

Topic Description

Objective:

Objective:

The RISE scheme will promote **international and inter-sector collaboration through research and innovation staff exchanges, and sharing of knowledge and ideas from research to market** (and vice-versa).

The scheme fosters a **shared culture of research and innovation** that **welcomes and rewards creativity and entrepreneurship** and helps to turn creative ideas into **innovative products, services or processes.**

Scope:

RISE involves **organisations from the academic and non-academic sectors** (in particular SMEs), based in Europe (EU Member States and Associated Countries) and outside Europe (third countries).

Support is provided for the **development of partnerships in the form of a joint research and innovation project.** This is aimed at knowledge sharing via international as well as intersectoral mobility, based on secondments of research and innovation staff (exchanges) with an in-built return mechanism.

RISE

The organisations constituting the partnership contribute directly to the implementation of a joint research and innovation project by **seconding and/or hosting eligible staff members**. Secondments shall always take place between legal entities independent from each other^[1].

RISE should **exploit complementary competences** of the participating organisations, as well as other synergies, and enable networking activities, **organisation of workshops and conferences to facilitate sharing of knowledge, new skills acquisition and career development** for research and innovation staff members.

RISE projects can focus either on one dimension of **mobility (intersectoral / international)**, or include a combination of both.

Exchanges can be for both **early-stage and experienced researchers'** levels and can also include **administrative, managerial and technical staff directly involved in the research and innovation activities** of the proposal.

Support for the exchanges between institutions within Europe (EU Member States and Associated Countries) covers only intersectoral secondments.

Exchanges with institutions from and to third countries can be intersectoral as well as within the same sector. Secondments between institutions located in third countries or within the same EU Member State or Associated Country will not be supported.

Expected Impact:

At staff member level:

- Increased set of **skills**, both research-related and transferable ones, leading to improved employability and career prospects both in and outside academia
- Increase in **higher impact R&I output**, more **knowledge and ideas converted into products and services**
- Greater contribution to the **knowledge-based economy and society**

At organisation level:

- Enhanced **cooperation and transfer of knowledge between sectors and disciplines**
- Strengthening of international and intersectoral collaborative networks
- Boosting of R&I capacity among participating organisations

At system level:

- Increase in international, interdisciplinary and intersectoral mobility of researchers in Europe
- Strengthening of Europe's human capital base in R&I
- Increase in Europe's attractiveness as a leading destination for R&I
- Better quality R&I contributing to Europe's competitiveness and growth

Cross-cutting Priorities:

Socio-economic science and humanities

Gender

International cooperation
