Anexa nr. 17 - COMISIA INGINERIE MECANICĂ, MECATRONICĂ ȘI ROBOTICĂ STANDARDE MINIMALE NECESSARE ȘI OBLIGATORII PENTRU CONFERIREA TITLURILOR DIDACTICE DIN ÎNVĂȚĂMÂNTUL SUPERIOR ȘI A GRADELOR PROFESIONALE DE CERCETARE – DEZVOLTARE

Se consideră trei criterii principale de evaluare, corespunzătoare următoarelor categorii de activități:

1. Activitate de cercetare științifică, dezvoltare tehnologică și inovare (acronim **CDI**)

2. Activitate didactică (acronim **DID**)

3. Recunoaștere și impactul activității (acronim **RIA**)

Tabelul 1. Criterii de evaluare și obiective asociate

Activitate de cercetare științifică, dezvoltare tehnologică și inovare (CDI)	Activitate didactică și profesională (DID)	Recunoaștere și impactul activității (RIA)
<ul style="list-style-type: none"> • Vizibilitate, calitate și recunoaștere internațională a rezultatelor CDI • Dezvoltare soluții tehnice și produse originale, cu impact socio-economic • Diseminarea rezultatelor cercetării-dezvoltării-inovării 	<ul style="list-style-type: none"> • Dezvoltare / modernizare infrastructură educațională • Dezvoltare și modernizare discipline generale și de specialitate • Dezvoltare de institute, centre, laboratoare de cercetare 	<ul style="list-style-type: none"> • Atragere resurse financiare prin granturi și contracte • Director sau responsabil partener granturi și contracte • Membru în echipa de cercetare grant/contract.

Pentru cadrele didactice din învățământul superior vor fi utilizate standarde minime corespunzătoare celor trei criterii, CDI, DID și RIA, iar pentru acordarea gradelor profesionale în domeniul cercetării-dezvoltării vor fi utilizate criteriile CDI și RIA.

Principii de evaluare cantitativă a criteriilor și de stabilire a standardelor minime

Evaluarea criteriilor cu indicatorii din Tabelul 2 ține cont de următoarele principii:

- Punctajul corespunzător unui criteriu se constituie din suma punctajelor aferente indicatorilor principali și complementari ai criteriului
- Din valoarea punctajului unui criteriu, minim 60% trebuie să provină din indicatorii principali. Punctajul corespunzător standardului minimal pentru criteriu poate fi realizat integral cu indicatorii principali
- Din valoarea punctajului unui criteriu, maxim 40% poate să provină din indicatorii complementari. Punctajul corespunzător standardului minimal pentru criteriu NU poate fi realizat integral cu indicatorii complementari

Pentru ocuparea prin concurs a pozițiilor în învățământul superior sau în cercetare-dezvoltare, instituțiile pot adopta și alți indicatori de evaluare (principali sau complementari). Standardele minime stabilite prin prezentă metodologie reprezintă criteriu de eligibilitate pentru participarea la concursurile pentru ocuparea pozițiilor în învățământul superior sau în cercetare-dezvoltare, respectiv pentru validarea rezultatului concursului de către CNATDCU.
