Tehnologii moderne

Aplicatiile multimedia au transformat relatiile dintre fiintele umane. Ele au simplificat si au imbunatatit relata dintre oameni si aparate. Descoperirile tehnologiei au dus la miniaturizarea componentelor electronice si au creat astfel calculatoare din ce in ce mai mici si, prin urmare, mai usor de transportat. Calculatoarele portabile pot fi dotate cu o unitate CD-Rom, un modem si un telefon mobil. Astfel putem telefona usor, putem trimite si primi faxuri sau putem intra in reteaua Internet, oriunde ne-am afla. Pe piata si-au facut aparitia PDA-urile.

Ce sunt PDA-urile?

PDA (Personal Digital Assistant) reprezinta o adevarata centrala de comunicare fara fir. Ea combina functiile unei agende electronice, ale unui repertoriu telefonic, ale procesorului de texte, ale Minitelului, ale faxului si ale postei electronice. Toate datele inregistrate pe PD pot fi transferate pe un calculator. Probabil ca in curand vor fi puse in vanzare si alte aparate mobile.

Tendinte

Se lucreaza, de exemplu, la realizarea unor ecrane de televizor plate si subtiri, groase de numai cativa milimetri. Printre altele, ecranele portabile de dimensiunea unei carti in format de buzunar vor permite incarcarea directa a paginilor unui ziar sau ale unui roman pe un calculator portabil. Generatia urmatoare cercetarile se orienteaza acum spre eliminarea intermediarilor cum sunt mouse-ul, tastatura sau manusa cu date pentru a putea da instructiunile

MOOC

- ▶ Massive Open Online Courses (MOOCs)
 - ▶ As its name suggests, a massively open online course (MOOC) is a model for delivering learning content online to virtually any person—with no limit on attendance—who wants to take the course. Participants can be students enrolled at the institution hosting the MOOC or anyone with Internet access. The “open” students, who pay nothing to participate, can join in some or all of the course activities, which might include watching videos, posting on discussion boards and blogs, and commenting via social media platforms, though anything hosted by the institution’s LMS would likely be off-limits
-

MOOC

- ▶ In 2008, George Siemens and Stephen Downes co-taught a class thought to be the first to use the term MOOC. The course, called “Connectivism and Connective Knowledge,” was presented to 25 tuition-paying students at the University of Manitoba and offered at the same time to around 2,300 students from the general public who took the online class at no cost.

ScienceDirect, Scopus sau Springer Link? Care este cea mai relevantă bază de date academică?

- ▶ Deși Scopus are cele mai numeroase rafinări de căutare, cel mai eficient este Springer Link, care în detrimentul celoralte a oferit un număr mult mai mare (două milioane) de rezultate pentru cuvântul cheie ales (*Open Science*).
- ▶ Springer Link nu are nevoie ca cercetătorii să-și transfere drepturile de autor. Le permite acestora să decidă dacă articolele lor sunt publicate sub o licență cu acces liber sau cu acces restricționat.

1000 Portraits

two photographers · one camera · one weekend · a thousand people

Our project is a true portrait of Britain created by photographing 1,000 people. We stopped everyone who crossed our path on the streets of London, excluding nobody, asking the same question more than fifteen hundred times. In a moment where recession is the main subject of every discussion, it was striking to come across such positive attitude. This is the true face of Britain.

A great project by [Carlo Nicora](#) and [Fabulous Muscles](#). To see more portraits from the streets of London check out their sets [Thousand Portraits](#) and [One Thousand Portraits](#).

Academic Writing

These OWL resources will help you with the types of writing you may encounter while in college. The OWL resources range from rhetorical approaches for writing, to document organization, to sentence level work, such as clarity. For specific examples of writing assignments, please see our Common Writing Assignments area.

The Rhetorical Situation

This presentation is designed to introduce your students to a variety of factors that contribute to strong, well-organized writing. This presentation is suitable for the beginning of a composition course or the assignment of a writing project in any class.

Establishing Arguments

These OWL resources will help you develop and refine the arguments in your writing.

Logic in Argumentative Writing

This resource covers using logic within writing—logical vocabulary, logical fallacies, and other types of logos-based reasoning.

Paragraphs and Paragraphing

The purpose of this handout is to give some basic instruction and advice regarding the creation of understandable and coherent paragraphs.

Essay Writing

The Modes of Discourse—Exposition, Description, Narration, Argumentation (EDNA)—are common paper assignments you may encounter in your writing classes. Although these genres have been criticized by some composition scholars, the Purdue OWL recognizes the wide spread use of these approaches and students' need to understand and produce them.

Conciseness

This resource will help you write clearly by eliminating unnecessary words and rearranging your phrases.
