

COMPETENCES OF UPT GRADUATE IN:
Fundamental domain: Engineering Sciences
Master's degree study programme:
„COMMUNICATIONS NETWORKS”
(Master's study field: Electronics, Telecommunications and Information Technologies)

Nr. crt.	Competences
C1	Interdisciplinary approach, problem definition, solution identification and management for electronic and telecommunication systems development.
C2	Application of testing, diagnosis and quality engineering principles for software applications implemented on electronic and telecommunication systems.
C3	Hardware and software applications development for electronics and telecommunications systems using new technologies.
C4	Innovative problem solving based on team work and interdisciplinary cooperation.
