Workshop in Sasca Montana on decontaminating soils in mining areas

Politehnica University Timisoara (Romania) and the Mining and Metallurgy Institute Bor (Serbia) jointly launched a project in 2019 to develop an educational and research network, in charge with initiatives to protect the environment and ensure the sustainable use of natural resources in the Romanian-Serbian cross-border area where mining activities took place or are still carried out.

Thursday, November 7, 2019 11:00, the Sasca Română Community Hall (Revoluția din 1989 Str.), Sasca Montană, Caraș-Severin County, hosts a new workshop in a rural traditional mining area, to bring together experts and representatives of the local community, to help local authorities in adopting informed decisions to decrease the negative impact of pollution due to mining activities. The workshop also aims at extending the network initiated by Politehnica University Timisoara (Romania) and the Mining and Metallurgy Institute Bor (Serbia) with representatives from Sasca Montana area.

The activity of the network is financed by the project "Forming of network for enhancing environmental protection from pollutants of mining cross border areas", acronym NETMIN, eMS no. RORS-308, within the framework of the **Interreg-IPA Cross-border Cooperation Romania-Serbia Programme**, which ensures 85% of the funds.
