

# Personal ERASMUS – Report

Name: Kolarević Pavle

Sending institution: University of Kragujevac,

Faculty of Mechanical and Civil Engineering in Kraljevo

Receiving institution: Polytechnic University,

Faculty of Mechanical Engineering Timisoara

Homecountry: Serbia

Mobility period: 15.02.2016 – 03.07.2016

## The application:

I decided to apply for the student exchange program because I personally think that several months in another country represents an experience that may affect on my later life and career. The basic motive of my application to the Erasmus+ program is to learn about another culture, another country, and of course meeting new people, especially those ones who grow up in different conditions and different society than it is case with me.

## Studies at the University of Politehnica, Timisoara:

I decided to apply for the exchange with Polytechnic University of Timisoara because of academic offer of master's degree project in Preparation of master's degree project in itegrated engineering, which is compatible with my interests and with the field I selected for my master thesis at my home Faculty.

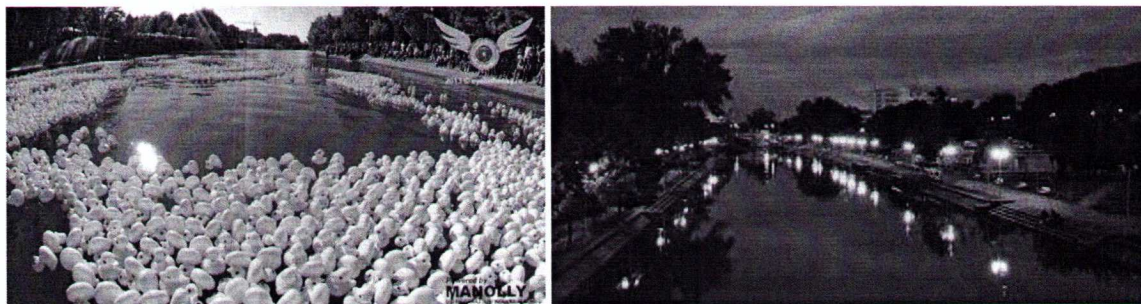

Polytechnic University is separated in different faculties. The faculties are situated around Timisoara and all of them are not far from each other and the dormitory is near by. There is a complex of 22 dormitories, and all are next to eaxh other which means that you are not far from any student.

Timisoara main square

For me it was the first visit of Timisoara, and Romania as well. I could live in this city. Everywhere around are old buildings, 3 squares, 2 big shopping centers... A lot of nice things to see and to try. If you are visiting Timisoara, don't say NO for trying Romanian food. Timisoara has a river Bega, which is very nice and it is covered by boats which you can be on, or you can ride a bicycle or walk on the riverside. The city has a lot of parks, and all of them are beautiful. The night life is the same like in Serbia, and the most important fact is that is not that expensive, as an Erasmus student you will be going out a lot.

Bega river

The Buddies will organize a lot of stuff for international students (Welcome day, Present your country...). These events are made only for Erasmus students, so you are going to meet a lot of people from all around the world.

Taiwan, Serbia, France

3xRomania, Serbia

### My conclusion:

This second semester of master I will never forget, I had very good time. By choosing Timisoara, I made a perfect choice. Romanian people are very kind and friendly. Also the people from Erasmus exchange were great and I am really glad that I met all those people, some of them maybe friends for life.

Special thanks to all the people from Erasmus community, which make this possible! You are doing a great job.

Sincerely, Pavle Kolarević
