Nominations and number of students accepted: Up to 45. Usually we can accept at least 5 students per partner. For nominating, please send your students information to erasmusbip@ual.es before March 31st 2023

Content of the onsite program: The course focuses on the current problem of the depopulation of rural municipalities on a global and local level. Its objective is to analyse different measures that are being carried out in relation to this problem.

The course will be eminently practical. Two of the days will be spent to visit the municipalities of Lubrín and Almócita, both of which are reference points in terms of agri-foodstuffs and ecology.

There will also be a visit to the Natural Park of Cabo de Gata and a workshop on how to cut Spanish ham.

In addition to Spanish professors and professionals, there will be guest lecturers from Portugal and Germany.
